# CONEXIONES CONNECTIONS CONNECTIQUE

Las conexiones hidráulicas conectan a través de mangueras y racores con las tomas de las maquinas industriales y los componentes hidráulicos, completando sistemas hidráulicos capaces de transmitir la potencia necesaria. Las conexiones para garantizar su funcionamiento han de ser de fácil ensamblaje, resistentes a las altas presiones y a la corrosión.

Es fundamental que, las mangueras hidráulicas y sus conexiones, sean compatibles para que los sistemas hidráulicos trabajen con la fiabilidad necesaria, dando respaldo a sus sistemas de producción industrial.

Las conexiones Vincke son reconocidas por su amplitud y versatilidad de gama. Con más de 4.500 referencias, mangueras, racores, enchufes, y válvulas hidráulicas, compatible con la mayoría de los estándares internacionales, así como a los requisitos específicos de nuestros principales clientes OEM.

En función de los equipos industriales y sus sistemas hidráulicos existen diferentes tipos de conexiones hidráulicas que Vincke comercializa.

**Hydraulic connectors link hydraulic hoses** to the outlets of industrial machinery, completing hydraulic systems able to transmit the necessary power. In order to guarantee operability, the connectors have to be easily assembled and resistant to both high pressures and corrosion. It is fundamental for hydraulic hoses and their connectors to be compatible in such a way as to enable hydraulic

systems to function with the required reliability, thereby underpinning industrial production.

**Vincke connectors** are renowned for their range of breadth and adaptability. With over 4,500 items, hoses, fittings, plugs and hydraulic valves, they adapt to the majority of common international standards as well as the specific requirements of our main OEM clients.

**Les raccords hydrauliques** relient les flexibles hydrauliques aux entrées des machines industrielles, complétant ainsi les systèmes hydrauliques capables de transmettre la puissance nécessaire. Pour garantir leur fonctionnement, les raccords doivent être faciles à monter, résistants aux hautes pressions et à la corrosion.

Il est essentiel que les tuyaux hydrauliques et leurs raccords soient compatibles pour que les systèmes hydrauliques fonctionnent avec la fiabilité nécessaire, en soutenant vos systèmes de production industrielle.

Les connexions Vincke sont reconnues pour leur étenue et la polyvalence de leur gamme. Avec plus de 4 500 références, les flexibles, raccords, bouchons et vannes hydrauliques s'adaptent à la plupart des normes internationales courantes, ainsi qu'aux exigences spécifiques de nos principaux clients OEM.

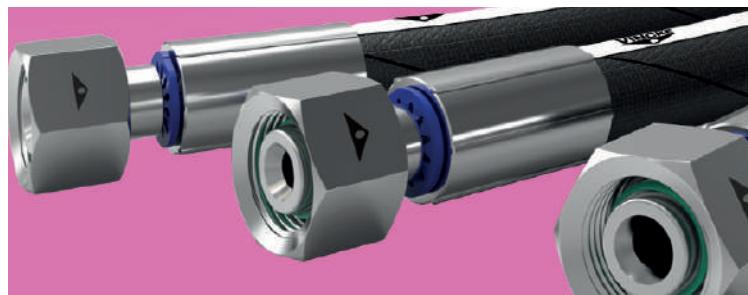

En fonction de l'équipement industriel et de ses systèmes hydrauliques, il existe différents types de raccords hydrauliques commercialisés par Vincke.

### TUYAUX ET RACCORDS

**La manguera** es un tubo flexible fabricado para soportar altas presiones, las mangueras suelen incorporar capas de malla metálica trenzada o textil en número variable en función de la presión que ha de soportar.

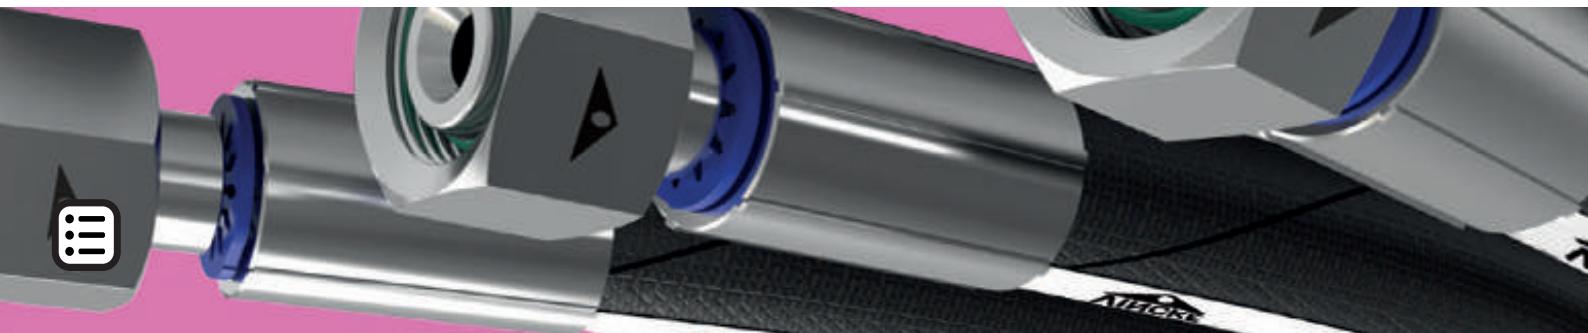

Las mangueras Vincke cumplen con los requisitos de flexibilidad, resistencia y durabilidad, que certifican nuestro sello de calidad. Son tu solución para cualquier aplicación con transporte de fluidos: mangueras de caucho, termoplásticas, PTFE e inoxidables.

**A hose** is a flexible tube produced to withstand high pressures, they tend to incorporate layers of braided steel or textile in varying numbers according to the pressures they have to withstand.

Vincke hoses meet the requirements of flexibility, strength and endurance certified by our seal of quality. They represent your solution to transporting fluids: steel and textile reinforced spiral and braided, rubber, heat-resistant, PTFE and stainless steel hoses.

**Le tuyau** est un tube flexible fait pour résister à une pression élevée, les tuyaux intègrent généralement des couches de treillis métallique tressé ou textile en nombre variable selon la pression à supporter.

Les flexibles Vincke répondent aux exigences de flexibilité, de résistance et de durabilité certifiées par notre label de qualité. Ils sont votre solution pour toute application impliquant le transport de fluides : flexibles spiralés et tressés à renfort métallique et textile, caoutchouc, thermoplastique, PTFE et inox.

**La gama de mangueras hidráulicas Vincke** es una amplia selección de productos destinados a soportar aplicaciones hidráulicas tanto generales como especiales. Desde la construcción y la agricultura hasta la minería, forestal y el mar. Las mangueras Vincke están diseñadas para cumplir y superar los requisitos ambientales y operativos más exigentes, asegurando una larga vida útil, un alto rendimiento y un servicio excelente.

**Vincke's range of hydraulic hoses** is a wide selection of products designed for both general and specialized hydraulic applications. From building and agriculture to mining, forestry and marine work, Vincke hoses are made

to surpass the most demanding environmental and operational requirements, assuring a long operational life, high performance and excellent service.

**La gamme de flexibles hydrauliques Vincke** est une large sélection de produits conçus pour prendre en charge les applications hydrauliques générales et spéciales. De la construction et de l'agriculture à l'exploitation minière, forestière et offshore, les flexibles Vincke sont conçus pour satisfaire et dépasser les exigences environnementales et opérationnelles les plus exigeantes, garantissant une longue durée de vie, des performances élevées et un excellent service.

# MAN24 MAN25

**La solución SMOOTH en 2SC y 2SNK** está diseñada para una alta resistencia a la abrasión y a la intemperie de manguera a manguera en aplicaciones de flexión sin fricción y sin impacto. Compuesto por una capa de caucho sintético resistente con una capa exterior adicional de polietileno de ultra alto peso molecular (UHMWPE), su resistencia tanto a la abrasión como al ozono. De hecho, la resistencia a la abrasión de la cubierta SMOOTH 2SNK es perfecta para situaciones en las que un montón de mangueras rozan entre sí, y el acabado suave de la cubierta ofrece una alternativa fácil de limpiar a las protecciones de resorte.

The **SMOOTH in 2SC and 2SNK** solution is designed for high hose to hose abrasion and weathering resistance in none friction flexing and non-impact applications. Comprising a tough synthetic rubber layer with an additional ultra-high molecular weight polyethylene (UHMWPE) outer

skin, its resistance to both abrasion and ozone. In fact the abrasion resistance of SMOOTH 2SNK cover is perfect for situations where bunches of hoses rub against each other, and the smooth cover finish provides an easy-to-clean alternative to spring guards.

**La solution SMOOTH en 2SC et 2SNK** est conçue pour une résistance élevée à l'abrasion et aux intempéries de tuyau à tuyau dans des applications de flexion sans frottement et sans impact. Composé d'une couche de caoutchouc synthétique robuste avec une peau extérieure supplémentaire en polyéthylène à poids moléculaire ultra élevé (UHMWPE), sa résistance à la fois à l'abrasion et à l'ozone. En fait, la résistance à l'abrasion du revêtement SMOOTH 2SNK est parfaite pour les situations où des groupes de tuyaux se frottent les uns contre les autres, et la finition lisse du revêtement offre une alternative facile à nettoyer les protections à ressort.

## RECOMENDACIONES DE ENSAMBLAJE ASSEMBLY RECOMMENDATIONS RECOMMANDATIONS DE MONTAGE

Evitar torsión.

Avoid twisting the hose.

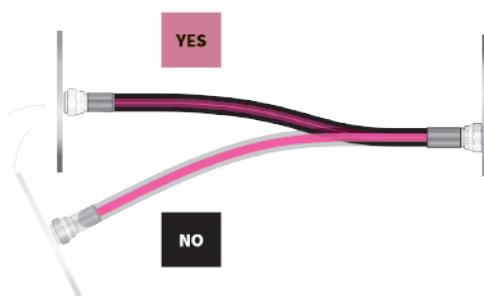

Éviter la **torsion** du tuyau.

Evitar instalar la manguera demasiado ajustada. Le recordamos que las normas DIN y SAE prevén que la manguera bajo presión puede alargarse (máx. 2%) o incluso acortarse. (máximo 4%).

Avoid installing the hose too tightly. We remind you that DIN and SAE standards provide that the hose under pressure can elongate (max. 2%) or even shorten. (maximum 4%).

Évitez d'installer le tuyau trop serré. Nous vous rappelons que les normes DIN et SAE prévoient que le tuyau sous pression peut s'allonger (max. 2%) voire se raccourcir. (maximum 4%).

En caso de movimiento, tenga especial cuidado para evitar **torsiones, tensiones o abrasiones**.

In case of movement, take special care to avoid **twisting, straining or abrasions**.

En cas de mouvement, veillez tout particulièrement à éviter les **torsions, déformations ou les abrasions**.

Elegir el tipo de montaje más adecuado para eliminar posiciones incorrectas.

To choose the most appropriate type of fitting in order to eliminate any incorrect positions.

Choisir le type de montage le plus approprié afin d'éliminer les positions incorrectes.

Verifique que la manguera, una vez instalada, no tenga un **radio de curvatura menor** que el informado en la ficha técnica.

Check that the hose, when installed, has not a **smaller bending radius** than reported in the respective data sheet.

Vérifiez que le tuyau, une fois installé, n'a pas un **rayon de courbure inférieur** à celui indiqué dans la fiche technique respective.

Vincke es un experto en el diseño y la fabricación de mangueras de acero inoxidable según las especificaciones del cliente y bajo la norma EN ISO 15614-1.

Vincke is an expert in the design and fabrication of stainless steel hoses according to the customer's specifications and according to EN ISO 15614-1.

Vincke est expert dans la conception et la fabrication de tuyaux en acier inoxydable selon les spécifications du client et respectant la norme EN ISO 15614-1.

## ¿Cuando debemos utilizar mangueras inoxidables corrugadas?

In which cases should corrugated stainless steel hoses be used?

Quand doit-on utiliser des flexibles ondulés en acier inoxydable?

-TEMPERATURAS EXTREMAS

Fría o caliente.

-COMPATIBILIDAD QUÍMICA

La manguera inoxidable puede soportar una variedad más amplia de productos químicos que la mayoría de los otros tipos de manguera.

-PROBLEMAS DE PERMEACIÓN

La manguera de inoxidable no permite la permeación.

-PROBLEMAS DE ABRASIÓN

Y DOBLADO EXCESIVO

-SEGURIDAD CONTRA INCENDIOS

-EXTREME TEMPERATURES

cold or hot

-CHEMICAL COMPATIBILITY

stainless steel hoses are able to withstand a wider variety of chemical products than the majority of other types of hoses.

-PERMEATION PROBLEMS

stainless steel hoses prevent permeation.

-ABRASION AND EXCESSIVE BENDING PROBLEMS

-FIRE PREVENTION

-TEMPÉRATURES EXTRÊMES

Froid ou chaud.

-COMPATIBILITÉ CHIMIQUE

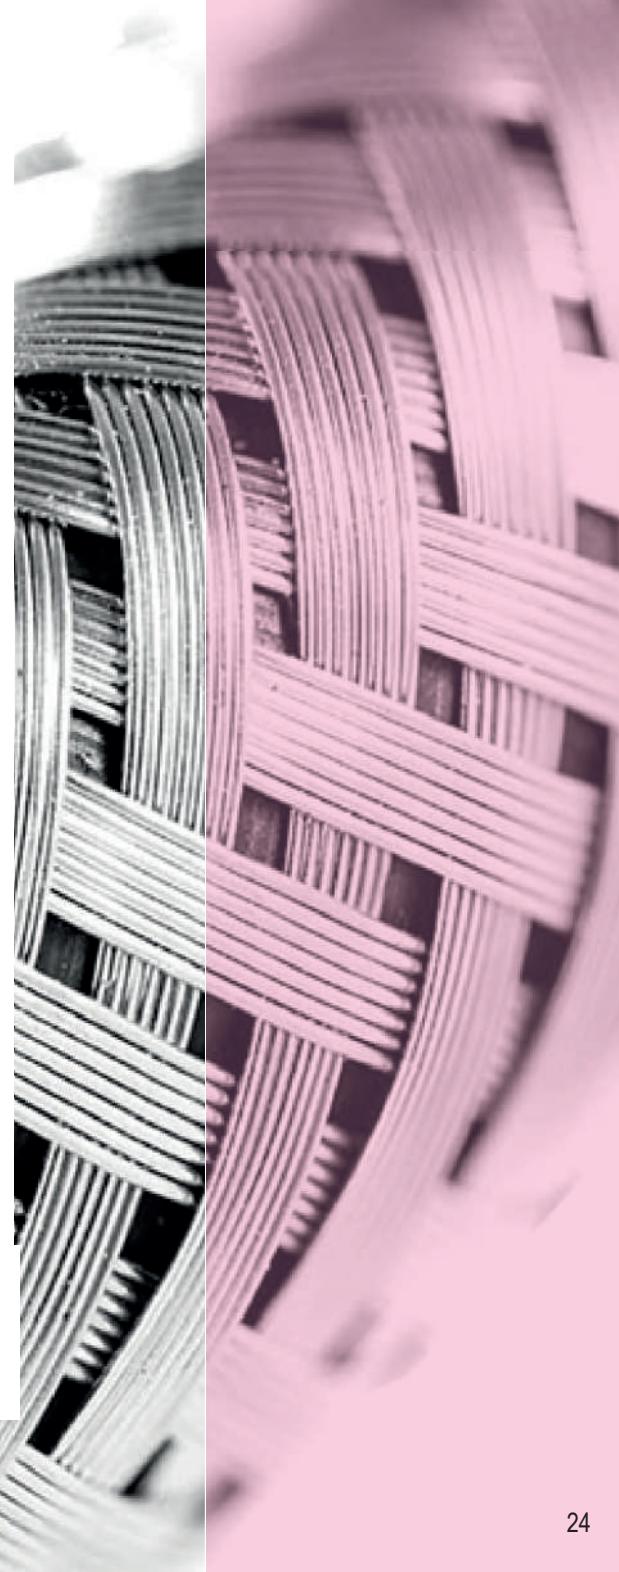

Les tuyaux en acier inoxydable peuvent résister à une plus grande variété de produits chimiques que la plupart des autres types de tuyaux.

-PROBLÈMES DE PERMÉATION

Le tuyau en acier inoxydable ne permet pas la perméation.

-PROBLÈMES D'ABRASION ET DE FLEXION EXCESSIVE

-SÉCURITÉ INCENDIE

# **CONEXIONES PRENSAR ALTA ALTÍSIMA PRESIÓN**

## **HIGH AND EXTREMELY HIGH CRIMPING FITTINGS**

### **CONNEXIONS A SERTIR HAUTE/TRES HAUTE PRESS**

Ofrecemos la gama completa de racores para mangas hidráulicas. Fabricados en acero carbono o acero inoxidable AISI 316L tratados térmicamente y protegidos con proceso electro galvánico con zinc cromo III o zinc-níquel.

Tanto racores para 1 y 2 mallas, como para 4 y 6 espirales, nuestro sistema no precisa pelado en la manguera. Garantizado.

We offer a complete range of HOSE fittings for hydraulic hoses. Made of either carbon or stainless steel AISI316L, heat treated and protected by a zinc-chrome or zinc-nickel electro galvanizing process. Neither our 1 and 2 braided hoses nor our 4 and 6 spiral hoses require hose skiving. Guaranteed.

Nous proposons la gamme complète de raccords à pression pour flexibles hydrauliques. Fabriqué en acier au carbone ou en acier inoxydable AISI 316L traité thermiquement et protégé par procédé électro-galvanique avec du zinc chrome III ou du zinc-nickel. Notre système pour 1 et 2 tresses et pour 4 et 6 spirales ne nécessite pas de dénudage dans le tuyau. Garanti.

Las mangueras Vincke están probadas bajo la norma EN ISO 6803:2017.

Ensayo por pulsos de presión hidráulica. Podemos probar tus racores con nuestra manguera!

Vincke hoses are tested under EN ISO 6803:2017.

Hydraulic pressure impulse test. We can test your fittings with our hose!

Les tuyaux Vincke sont testés selon la norme EN ISO 6803:2017. Test d'impulsion de pression hydraulique. Nous pouvons tester vos raccord à sertir avec notre tuyau !

# ESPECIALISTAS EN FABRICACIÓN DE MANGUERAS HIDRÁULICAS.

## SPECIALISTS IN HYDRAULIC HOSES ASSEMBLY.

## SPÉCIALISTES EN MONTAGE DE TUYAUX HYDRAULIQUES.

Proporcionamos un servicio rápido de montaje de flexibles. Operando según los procesos DIN20066, nos aseguramos de que nuestros clientes siempre obtengan una manguera hidráulica ensamblada, segura y de alta calidad.

Providing a rapid high-quality hose assembly service. Operating to DIN20066 processes, we make sure our customers always get a safe, high quality, assembled hydraulic hose.

Nous assurons l'assemblage rapide de tuyaux de haute qualité. Opérant selon les processus DIN20066, nous nous assurons que nos clients obtiennent toujours un tuyau hydraulique assemblé sûr et de haute qualité.

# ENCHUFES RÁPIDOS

## QUICK RELEASE COUPLINGS

### COUPLEURS RAPIDES

**El enchufe rápido** es un elemento de conexión que permite un acople rápido y eficiente a la línea de fluido que alimenta el funcionamiento de herramientas y accesorios. Los enchufes rápidos aportan eficiencia, la productividad y la seguridad en los sistemas hidráulicos.

En aplicaciones que precisan acoplamientos rápidos, ofrecemos Vincke y Stucchi. Ambas marcas están compuestas por una gama de productos en constante expansión, nuestros enchufes rápidos son sinónimo de calidad y rendimiento.

**The hydraulic quick** connector is a component which allows a fast and efficient connection to the fluid line powering tools and accessories. Hydraulic quick release couplings bring efficiency, productivity and safety in hydraulic systems.

In operations requiring quick couplings, we offer both Vincke and Stucchi. Both brands comprise a product range in constant expansion and our couplings are synonymous with quality and performance.

**Le raccord rapide** est un élément de connexion qui permet un couplage rapide et efficace à la ligne de fluide qui alimente le fonctionnement des outils et accessoires. Les raccords rapides apportent efficacité, productivité et sécurité aux systèmes hydrauliques.

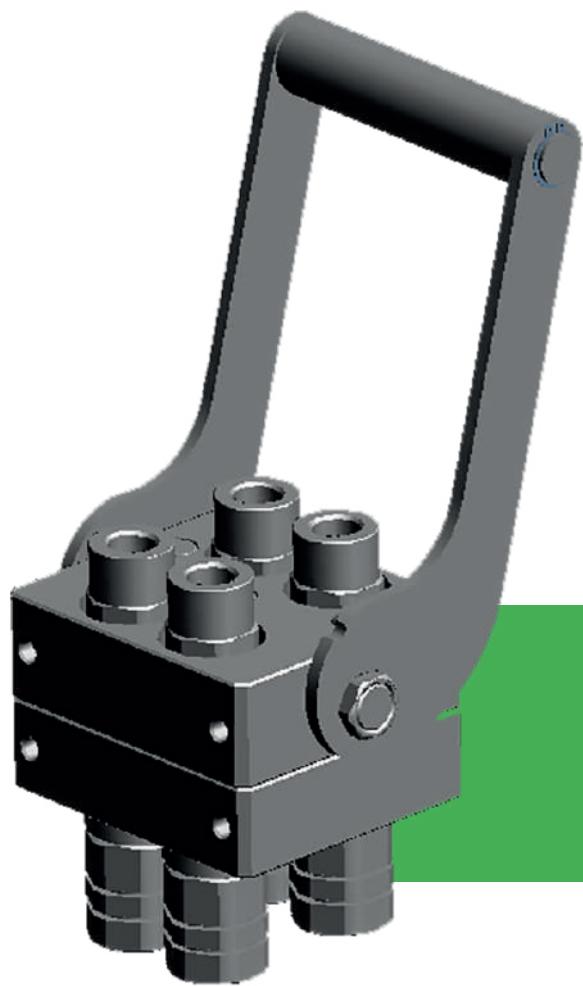

Pour les applications nécessitant des raccords rapides, nous proposons Vincke et Stucchi. Les deux marques sont composées d'une gamme de produits en constante expansion, nos raccords rapides sont synonymes de qualité et de performance.

# RACORES INOXIDABLE AISI 316L VINCKE VINCKE STAINLESS STEEL FITTINGS AISI 316 RACCORDS EN ACIER INOX AISI 316L VINCKE

**Todas las conexiones inoxidables Vincke** son fabricadas en AISI 316L, cumpliendo los estandares de calidad. Racores de prensar, adaptadores BSPP, válvulas de bola, enchufes rápidos, flexibles corrugados soldados.

All **Vincke connectors** are fabricated to AISI316L standards, meeting quality standards. hose fittings, BSPP adaptors, ball valves, quick release couplings. Assembled flexible hoses.

Tous les **raccords en acier inoxydable Vincke** sont fabriqués en AISI 316L, répondant aux normes de qualité les plus élevées. Raccords à sertir, adaptateurs BSP, robinets à tournant sphérique, raccords rapides, flexibles ondulés soudés.

VINCKE  
HYDRAULICS

A photograph of a building's exterior wall. The words "VINCKE" and "HYDRAULICS" are written in large, black, 3D letters. A red circle is placed between the two words. The building has a light-colored, horizontally ribbed facade. A large, stylized number "60" is superimposed over the image, with its curves partially obscuring the building's facade and the company name.

AÑOS YEARS ANNÉES

A blue banner with the word "AÑOS" at the top, followed by "YEARS" and "ANNÉES" stacked vertically. The banner is part of a large, stylized number "60" that wraps around the building's facade.

## ES

Apreciado Cliente,

Es un placer compartir nuestro catálogo/tarifa 2023 donde presentamos nuestras dos líneas principales de producto, componentes y conexiones hidráulicas. Creemos que es uno de los catálogos con mayor gama, y lo más importante, más de un 90% es material de stock que podemos suministrar en 24 horas. La información técnica e imágenes son indicativas, le agradecemos que ante cualquier duda consulte a nuestro departamento técnico.

Este mismo catálogo/tarifa lo podrá encontrar en nuestra página web donde los productos y precios estarán siempre actualizados. Todos los precios están sujetos a las condiciones de venta ofrecidas por el departamento comercial. Los pedidos puede cursarlos desde nuestra web [www.vinckehydraulics.com](http://www.vinckehydraulics.com), por teléfono a nuestro equipo de ventas o bien por correo electrónico [distribucion@vinckehydraulics.com](mailto:distribucion@vinckehydraulics.com)

Este catálogo/tarifa se ha realizado con la colaboración de todo nuestro departamento comercial, compras, oficina técnica e informática con la intención de hacerlo útil y fácil de usar, y sobre todo que sea una buena herramienta que le ayude a comprar.

Los precios se entienden, caso de no expresar lo contrario, para mercadería situada en nuestro almacén, excluyendo el embalaje y el transporte al lugar de recepción, ni impuestos que serán siempre a cargo del comprador. Todas las operaciones de transporte, seguro, mantenimiento y entrega son a cuenta y riesgo del Comprador.

Las ofertas de material están basadas en los precios vigentes en la fecha de su realización, y si, debido a alteraciones en el coste de los materiales, modificación de aranceles o a cualquier otra causa, el nivel de precios fuese revisado, los precios que se aplicarían serían aquellos que rijan en la fecha del suministro, a menos que la oferta sea aceptada dentro del plazo de validez que en la misma se fije.

VINCKE podrá variar el precio, como consecuencia de cualquier ley que afecte a materiales, salarios o a las horas de trabajo y también a posibles cambios en la paridad de la moneda, en elementos de importación.

## CAT

Benvolgut Client,

És un plaer compartir el nostre catàleg/tarifa 2023 on presentem les nostres dues línies principals de producte, components i connexions hidràuliques. Creiem que és un dels catàlegs amb més gamma de producte, i el més important, més d'un 90% és material d'estoc que podem entregar en 24 hores. La informació tècnica i les imatges són indicatives, us agrairem que per qualsevol dubte contacteu amb el nostre departament tècnic.

Aquest mateix catàleg/tarifa el trobareu a la nostra pàgina web on els productes i els preus estaran sempre actualitzats.

Tots els preus estan subjectes a les condicions de venda que us ofereixi el departament comercial. Les comandes podeu cursar-les a [www.vinckehydraulics.com](http://www.vinckehydraulics.com), per telèfon al nostre equip de vendes o bé per correu electrònic a [distribucion@vinckehydraulics.com](mailto:distribucion@vinckehydraulics.com)

Aquest catàleg/tarifa s'ha realitzat amb la col·laboració de tot el nostre departament comercial, compres, oficina tècnica i informàtica amb la intenció que sigui útil i fàcil d'utilitzar, i sobretot una bona eina que us ajudi a comprar.

Els preus s'entenen, si no s'expressa el contrari, per a mercaderies situades al nostre magatzem, excloent-hi l'embalatge i el transport al lloc de recepció i els impostos que seran sempre a càrrec del comprador. Totes les operacions de transport, assegurança, manteniment i entrega són a risc del Comprador.

Les ofertes de material es basen en els preus vigents a la data de la seva realització, i si, per alteracions en el cost dels materials, modificació d'aranzels o qualsevol altra causa el nivell de preus fos revisat, els preus que s'aplicarien serien aquells vigents a la data de subministrament, excepte quan l'oferta sigui acceptada dins del termini de validesa que es fixi en la mateixa.

VINCKE podrá variar el preu com a conseqüència de qualsevol llei que afecti a materials, salariis o a les hores de feina i també a possibles canvis en la paritat de la moneda en elements d'importació.

## **EN**

Dear Client,

It is a pleasure to share our catalogue/price list 2023 with you and to present our two main lines of products, components and hydraulic connections. We believe this is one of the catalogues with the widest range of products, and most importantly, with more than 90% of item availability, deliverable in 24 hours. The technical information and picture supplied are for guidance only, for additional details please contact our technical department.

You can find this catalogue/price list on our website where products and prices are continuously updated.

All prices are also subject to the terms of sale offered by our commercial department. Orders can be placed by means of our website [www.vinckehydraulics.com](http://www.vinckehydraulics.com), by phone or by e-mail to [distribucion@vinckehydraulics.com](mailto:distribucion@vinckehydraulics.com)

We have developed this catalogue/pricelist together with our sales, purchasing, computer and technical departments in order to make it useful and easy to use, but, above all, as a tool to fulfill your purchases easier.

Prices are understood, if otherwise indicated for goods placed in our warehouse, excluding packing and transport to the place of reception, nor taxes which shall always be in charge of the buyer. All transport, insurance, handling and delivery operations are at the Buyer's risk and expense.

Quotations are based on the prices in force at the date they are made and if, due to alterations in the cost of the materials, tax modification, the price level were revised, or any other reason, the prices that would be applied would be those in force at the date of the expedition, unless the quotation is accepted within the period indicated in the same.

VINCKE may vary the price, as a result of any law affecting materials, wages or hours of work and also possible changes in currency parity, in imported elements.

## **FR**

Cher Client,

Nous avons le plaisir de vous présenter notre catalogue/tarif 2023 dans lequel vous trouverez nos deux lignes principales de produits, composants et connexions hydrauliques. Ce catalogue propose une gamme plus large avec plus de 90% du matériel en stock, ce qui signifie que nous pouvons vous le livrer en 24 heures. L'information technique et photos sont à titre d'indication, aussi n'hésitez pas à contacter notre département technique en cas de doutes.

Ce même catalogue/tarif se trouve sur notre site web où les produits et les prix seront constamment mis à jour.

Tous les prix sont soumis à des conditions commerciales, qui seront toujours proposées par notre département commercial. Vous pouvez passer vos commandes sur notre site web [www.vinckehydraulics.com](http://www.vinckehydraulics.com) ou par téléphone, auprès de notre équipe de vente ou encore par courrier électronique à [distribucion@vinckehydraulics.com](mailto:distribucion@vinckehydraulics.com)

Ce catalogue/tarif a été réalisé en collaboration avec notre équipe commerciale, le département des achats, le bureau d'étude et le département informatique, afin qu'il soit pratique et facile à utiliser, mais surtout qu'il devienne un outil indispensable qui vous guide dans votre achat.

Les prix sont indiqués, sauf si l'est spécifié le contraire, pour la marchandise située dans notre magasin, frais d'emballages et de transport au lieu de réception non compris, et hors taxes -ces frais seront toujours à la charge de l'Acheteur. Toutes les opérations de transport, assurance, maintenance et livraison seront à la charge de l'Acheteur.

Les offres de matériel sont basées sur les prix en vigueur à la date de leur réalisation, et si, en raison de changements des coûts des matériaux, modification des tarifs douaniers ou pour toute autre cause, le niveau de prix serait révisé, les prix qu'on appliquerait seraient ceux valables à la date de l'expédition, sauf si l'offre a été acceptée dans le délai de validité indiqué sur celle-ci.

VINCKE pourra faire varier le prix, comme conséquence de n'importe quelle loi qui affecte les matériaux, les salaires ou les heures de travail, ainsi que d'éventuels changements de la parité de la monnaie, sur les éléments d'importation.
